PIPENET

Leading The Way in Fluid Flow Analysis

**Coming Soon - Pipenet Vision 1.50 is currently
being prepared for release at the end of the year!**

NEW!

PIPENET VISION Quick Demo - Spray/Sprinkler Module

PIPENET VISION Quick Demo - Transient Module

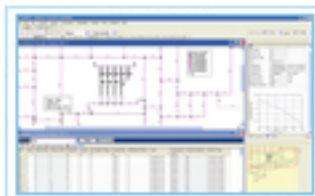

PIPENET VISION Quick Demo - Standard Module

PIPENET Vision 1.41 includes even more new features:

Compatible with Windows 7 and 64 bit systems
Improved Heat exchangers in the Standard module
The Transient module offers digital options for pressure sensors

PIPENET VISION Spray/Sprinkler Module Applications

- Offshore platforms
- FPSO's
- Refineries
- Power Plants
- Foam solution systems
- Firewater ringmain systems
- Deluge systems
- Sprinkler systems

PIPENET VISION Transient Module Applications

- Loading & unloading systems analysis
- Cooling water systems modelling
- Firewater systems surge analysis
- Generating loads from pipe stress analysis
- Subsea and cross country pipelines
- Process Safety

PIPENET VISION Standard Module Applications

- Cooling water systems
- Ventilation systems
- Fuel oil systems
- Water distribution systems
- Steam distribution systems
- Reheat steam systems
- Closed loop systems
- Compressed air systems
